1. USER STORY REGISTER FUNCTION

Title: Register		Priority: Must-have	Estimate: 12 hours
User story 1: Successful Register			
As a	New visitor		
I want to	Register for a new account using my email, username and password		
So that	I can start exploring all available cooking recipes.		
Acceptance Criteria (AC)			
Scenario 1: Successful Registration with valid information	Given	The user is on the Register screen	
	When	The user enters a valid email, a valid username and a password that meets security requirements, confirms the password, and taps the Register button	
	Then	The system creates a new user profile in the database (Firebase), logs the user in automatically, and redirects them to the Home screen.	
User story 2: Validate Registration Inputs			
As a	new visitor,		
I want to	the system to validate my registration inputs in real-time,		
So that	I can correct any errors before submitting the form.		
Acceptance Criteria (AC)			
Scenario 1: Password and Confirm Password do not match	Given	The user has filled in the email, username and password fields.	
	When	The user enters a different password in the “Confirm Password” field and taps “Register” button.	

	Then	The system stops the registration process and displays an error message: "Passwords do not match. Please try again."
<i>Scenario 2: Weak password format</i>	Given	The user is filling out the registration form.
	When	The user enters a password shorter than 6 characters and taps "Register" button.
	Then	The system displays a warning message: "Password must be at least 6 characters long."
<i>Scenario 3: Email or Username is already registered.</i>	Given	The user fills in all fields with valid formats.
	When	the user submits an email/ username that already exists in the system (Firebase).
	Then	The system displays an error message: "This email/ username is already registered. Please login or use another email/ username."

2. USER STORY LOGIN FUNCTION

Title: Login		Priority: Must-have		Estimate: 8 hours	
User story 1: Successful Login					
As a		Resgistered user			
I want to		Log in to application using my registered email and password			
So that		I can start exploring all available cooking recipes.			
Acceptance Criteria (AC)					
Scenario 1: Successful Login with valid information		Given	The user is on the Login screen		
		When	The user enters a valid registered email, the correct password and taps the Login button		
		Then	The system authenticates the credentials against the database (Firebase), logs the user, in redirects them to the Home screen.		
User story 2: Validate Login Inputs					
As a		Resgistered user			
I want		The system to validate my login credentials and display appropriate error messages			
So that		I can understand why my login failed and try again with the correct information.			
Acceptance Criteria (AC)					
Scenario 1: Empty Fields		Given	The user is on the Login screen.		
		When	The user leaves the email or password field blank and taps the “Login” button.		
		Then	The system stops the process and displays a warning: “Email and Password cannot be left blank.”		
Scenario 2:		Given	The user is on the Login screen.		

<i>Incorrect Password or Non-existent Email</i>	When	The user enters an incorrect password or an email that does not exist in the system, then taps "Login".
	Then	The system denies access and displays an error message: "Invalid email or password. Please try again."

3. USER STORY MANAGE PROFILE FUNCTION

Title: Manage Profile		Priority: Should-have	Estimate: 16 hours
User story 1: Update Personal Information			
As a	Logged-in user		
I want to	Update my profile details such as my avatar and display name		
So that	My personal information remains accurate and visible to the community		
Acceptance Criteria (AC)			
Scenario 1: Update successfully	Given	The user is on the “Manage Profile” screen.	
	When	The user changes their display name, uploads a new avatar, and taps the “Save” button.	
	Then	The system updates the data in Firebase, displays a “Profile updated successfully” message, and refreshes the user interface.	
Scenario 2: Empty display name	Given	The user is editing their profile.	
	When	The user clears the display name field and taps the “Save” button.	
	Then	The system stops the process and displays a warning message: “Display name cannot be left blank”	
User story 2: Change Password			
As a	Logged-in user		
I want	Change my current password to a new one within my profile settings		
So that	I can secure my account whenever I feel the current password is compromised.		
Acceptance Criteria (AC)			

<i>Scenario 1: Empty Fields</i>	Given	The user is on the Login screen.
	When	The user leaves the email or password field blank and taps the “Login” button.
	Then	The system stops the process and displays a warning: “Email and Password cannot be left blank.”
<i>Scenario 2: Wrong current password</i>	Given	The user is on the “Change Password” screen.
	When	The user enters an incorrect password in the “Current Password” field and submits.
	Then	The system stops the process and displays an error message: “Incorrect current password. Please try again.”
<i>Scenario 3: New passwords do not match</i>	Given	The user is on the “Change Password” screen.
	When	The user enters a different password in the “Confirm New Password” field compared to the “New Password” field.
	Then	The system stops the process and displays a warning: “New passwords do not match.”
<i>Scenario 4: Weak new password</i>	Given	The user is on the "Change Password" screen.
	When	The user enters a new password shorter than 6 characters.
	Then	The system displays an error message: "New password must be at least 6 characters long."

4. USER STORY VIEW RECIPE DETAILS FUNCTION

Title: View Recipe Details		Priority: Must-have	Estimate: 8 hours
User story 1: View Recipe Details			
As a	Logged-in user		
I want to	View the full details of a recipe including its ingredients and cooking steps		
So that	I can follow the instructions to cook the dish accurately.		
Acceptance Criteria (AC)			
Scenario 1: View details successfully	Given	The user is logged in and selects a specific dish from the Home or Search screen.	
	When	The user clicks on the dish item.	
	Then	The system successfully calls the Spoonacular API, fetches the data, and fully displays the ingredients list, step-by-step instructions, and preparation time.	
Scenario 2: Network Disconnection	Given	The user clicks on a dish item to view its details.	
	When	The user's device loses internet connection during the data request.	
	Then	The system stops loading, prevents a crash, and displays an error message: “No internet connection. Please check your network and try again”	

5. USER STORY COMMENT RECIPES FUNCTION

Title: Comment Recipes		Priority: Should-have	Estimate: 16 hours
User story:			
As a	Logged-in user		
I want to	Post comments with text and images on a recipe detail screen		
So that	I can share my feedback and cooking experience with others.		
Acceptance Criteria (AC)			
Scenario 1: Post comment successfully	Given	The user is viewing a recipe detail screen and scrolls to the comment section.	
	When	The user enters text, attaches an image, and clicks “Send”.	
	Then	The system saves the comment data to the database, refreshes the section, and displays the comment at the top of the list.	
Scenario 2: Empty Input	Given	The user is in the comment section.	
	When	The user leaves both text and image empty and clicks “Send”.	
	Then	The system stops processing and displays: “Comment cannot be empty.”	

6. USER STORY MANAGE FAVOURITES FUNCTION

Title: Comment Recipes		Priority: Should-have	Estimate: 8 hours
User story:			
As a	Logged-in user		
I want to	Add or remove recipes from my favorites list		
So that	I can save dishes I love for quick access later.		
Acceptance Criteria (AC)			
Scenario 1: Add to favorites	Given	The user is viewing a recipe that is not favorited yet.	
	When	The user taps the heart icon.	
	Then	The system saves the recipe to their favorite list in Firebase, turns the heart icon to solid red, and displays “Added to favorites”.	

7. USER STORY SEARCH RECIPES FUNCTION

Title: Search Recipes		Priority: Should-have	Estimate: 16 hours
User story:			
As a	Logged-in user		
I want to	Search for recipes by name, category, or ingredients		
So that	I can find the exact dishes that match my needs or current ingredients.		
Acceptance Criteria (AC)			
Scenario 1: Search by Name	Given	The user is on the Home screen or Category screen.	
	When	The user types a dish name (e.g., “Chicken”) into the search bar and presses enter.	
	Then	The system filters and displays all recipes containing the word “Chicken”.	
Scenario 2: Search by Ingredient	Given	The user is on the Home screen or Category screen.	
	When	The user selects available ingredients (e.g., “Tomato”, “Egg”) from the filter checkbox.	
	Then	The system calls the Spoonacular API to find and return recipes that can be cooked with those ingredients.	
Scenario 3: Search by Ingredient	Given	The user is on the Home screen or Category screen.	
	When	The user selects a specific category button (e.g., “Breakfast” or “Dessert”).	
	Then	The system filters and displays all cooking recipes belonging to the selected category.	

<i>Scenario 4:</i> <i>Network Disconnection</i>	Given	The user has entered search criteria (name, category, or ingredients).
	When	he user triggers the search action but the device loses internet connection.
	Then	The system stops loading, prevents a crash, and displays an error message: "No internet connection. Please check your network and try again."
